A.N.Solutions
INDUSTRIAL GRADE WIRELESS

A.N. Solutions GmbH is an agile and professional company that designs, develops, integrates, and manufactures intelligent, wireless sensor network technologies for standardised and proprietary system solutions of various integration types, and optimises these technologies within different customized target applications.

The company provides you with an opportunity to be involved in the development and shaping of our digital future on an innovative and long-term basis, in a demanding, varied environment with excellent personal development prospects. We are **currently** expanding our team and looking for

Software Developer (m/f/d) with a focus on application development GUI / HMI

Your future tasks would include:

➢ Software development, primarily PC applications with user interactions
➢ Support for the MS Windows operating system, ideally across platforms
➢ Design and development with web interfaces such as REST, SOAP, etc.
➢ Selection of application-specific concepts and approaches
➢ Layout of graphical user interfaces
➢ Implementation of project-specific functionalities, such as firmware or device controls

Your profile:

➢ Completed university degree in computer science, information systems technology or a comparable technical course of study, alternatively completed apprenticeship in a similar field
➢ Several years of professional experience in a comparable position
➢ Confident use of PC's under Windows and Linux
➢ Experience in object-oriented application development, ideally with C#, C++ or Java
➢ Knowledge of HMI development concepts
➢ Experience with MS Visual Studio and Eclipse
➢ Knowledge of design patterns and databases
➢ Proficient use of version control systems
➢ Analytical, structured and independent working method
➢ Good language skills in German (spoken and written)
➢ Ability to work in a team and strong communication skills (verbal and non-verbal)
➢ Experience with Raspberry PI, microcontrollers or wireless technologies is an advantage
