

Adaptive Network Solutions GmbH is an agile and professional company that designs, develops, integrates and manufactures intelligent, wireless sensor network technologies for standardised and proprietary system solutions of various integration types, and also optimises these technologies within different target applications.

The company provides you with an opportunity to be involved in the development and shaping of our digital future on an innovative and long-term basis, in a demanding, varied environment with excellent personal development prospects. We are currently expanding our team and looking for

## Hardware Developers (m/f) for $\mu$ C and wireless system applications

### Your future tasks would include:

- Design and implementation of system applications for wireless sensor networks
- Implementation of circuit design and PCB layout
- Concept development and implementation of new architecture approaches in collaboration with strategic development partners
- Technology scouting to investigate new system approaches and their synergetic integration in the company's product portfolio

### Your profile:

- Completed studies in electrical engineering, information technology or a related field
- Experience in the implementation of hardware projects
- Experience in circuit design (microcontrollers, sensors, wireless communication, etc.)
- Knowledge of common CAD tools for PCB design and manufacturing
- Analytical, structured and independent working method
- Good foreign language skills in English (spoken and written)
- Ability to work in a team and strong communication skills (verbal and non-verbal)

### Our offer:

- Dynamically growing company in a global business environment
- Efficiency as a result of flat hierarchies and short decision-making processes
- Development opportunities for creative ideas in an innovative environment
- Flexible working hours
- Attractive basic salary and variable competitive company benefits package
- Opportunities for further training and development

Does this sound like you, and would you like to become a part of our innovative company?  
All you need do is send us an email with your application ([careers@an-solutions.de](mailto:careers@an-solutions.de))  
We look forward to meeting you.
