

Adaptive Network Solutions GmbH is an agile and professional company that designs, develops, integrates and manufactures intelligent, wireless sensor network technologies for standardised and proprietary system solutions of various integration types, and also optimises these technologies within different target applications.

The company provides you with an opportunity to be involved in the development and shaping of our digital future on an innovative and long-term basis, in a demanding, varied environment with excellent personal development prospects. We are currently expanding our team and looking for

Electrical technician (m/f) for system development

Your future tasks would include:

- Prototype building of various hardware designs
- Support in 3D printing and creation of CNC prototypes
- Creation, implementation and documentation of advanced system testing (i.e. automation and networked test procedures, visualization of measurement data)
- Characterization of prototypes hardware (i.e. operational parameter measurements, climate tests)
- Realization of circuit development and PCB layout
- Concept development and implementation of innovative system tests and methods
- Technology scouting into new and innovative solutions and offerings

Your profile:

- Technician in electrical engineering, preferably in the field of information and communication technology or measurement and control technology or similar field
- Skills in hardware system development
- Experiences in circuit design (i.e. microcontrollers, sensors, wireless communication)
- Knowledge of common CAD tools for PCB design and manufacturing
- Structured and independent way of working with fun in the daily work
- Preferably foreign language skills in English (spoken and written)
- Ability to work in a team and strong communication skills

Our offer:

- Exciting projects using the leading-edge technologies
- Efficiency through flat hierarchies and short decision paths
- Development opportunities for creative ideas in an innovative environment
- Flexible working hours in combination with home office
- Modern workplace equipment in a young team environment
- Individual training and development opportunities
- Health benefits

Does this sound like you, and would you like to become a part of our innovative company?
All you need do is send us an email with your application (careers@an-solutions.de)
We look forward to meeting you.
